➤ **Vacancy – Laboratory technician Maternity Cover**

I am writing this letter to express my enthusiasm for the position of **Laboratory technician Maternity Cover** on website at the organization. The creativity and dedication of the organization have sparked my enthusiasm to apply for this job as soon as I saw the advertisement the amalgamation of experience in the health center, hospital, blood bank, university, and covid-19 outbreaks value will be unique and enriching experience for the position.

I have an experience of more the ten year in the health facility organization and I understand the community diagnosis problem and place myself for the solution with you. I have completed **BSC degree in medical laboratory science** in 2004 E.C from Wollega University, Ethiopia and also **completed master degree in Medical microbiology** in 2012 from Bahir Dar University. I am confident that my exposure, knowledge and skill will be an asset to your organization.

My past job experience include in medical laboratory professional as laboratory quality services, laboratory Diagnosis, medical laboratory procedure, performing SOP, disease prevention and control, disease processes and treatment in order to perform accurate and effective lab diagnosis and to report precise lab test result and also knowledgeable in community problem solving by performing community based published research and surveillance.

Recently I served as Expert Medical Microbiologist at Benishangul Gumuz Regional laboratory institute by performing Molecular biology laboratory diagnostic on PCR testing of covid-19, reporting of PCR result to BGHB, EPHI, and public health emergency management group. at health center as laboratory department head, quality office and ART coordinator at hospital, directorate at Assosa blood bank, educational quality coordinator at Assosa university and covid-19 coordinator during outbreak at Assosa health bureau and Benishangul Gumuz regional laboratory institute

I have also worked closely with leaders and higher position to provide the best community problem solving experience to the client/patient at health facility and university. I have also helped health professionals in job description to resolve any issue they may have. I believe that these above experiences as well as theoretical and clinical practice, and my medical microbiology training and long service skill that I developed in my previous job make me as strong candidate for the position posted by your esteemed organization.

I believe that strong relationship with all departments in the organization to take not the company but entire workgroup to ward success. I have taught myself to work cross-team and make friends in the entire organization.

I am not dependent worker. I can achieve the targets by working independently too. I am an extrovert and love people, but I can alone when the need arise. I am passionate about my work and getting the done is the most importance for me. I am confident you will find me a perfect fit for your organization. For more details, I have attached my CV.

Thank you for your time and consideration.

Sincerely

Samuel Abosse (BSc, MSc)
